

Index

Note: Page numbers of article titles are in **boldface** type.

A

- AAMC (Association of American Medical Colleges)
combined MBA/MD program list of, 382–383
resident training recommendations of, 242–243
- ABCC (American Board of Clinical Chemistry), laboratory director requirements of, 438–439
- ABMM (American Board of Medical Microbiology)
certification by, 369–370
laboratory director requirements of, 439
- ABMS (American Board of Medical Specialties)
educational requirements of, 273
on maintenance of certification, 270–271
- Academy of Clinical Laboratory Physicians and Scientists (ACLPS)
curriculum adopted by, 241
research importance emphasis of, 263–264
training goals of, 229–231, 233, 236
- Accreditation Council for Graduate Medical Education (ACGME)
competencies of, 255, 294–306
Outcome Project of, 269–280, 286
residency review committee of, 241–242
training goals of, 231–234, 238
web site of, 275–277
- Accreditation inspections, for transfusion medicine, 313–314
- ACGME. *See* Accreditation Council for Graduate Medical Education (ACGME).
- ACLPS. *See* Academy of Clinical Laboratory Physicians and Scientists (ACLPS).
- ACPE (American College of Physician Executives), curriculum guidelines of, 383
- ADASP (Association of Directors of Anatomic and Surgical Pathology)
laboratory management guidelines of, 387–388
training goals of, 231, 233, 236
- American Board of Clinical Chemistry (ABCC), laboratory director requirements of, 438–439
- American Board of Medical Microbiology (ABMM)
certification by, 369–370
laboratory director requirements of, 439
- American Board of Medical Specialties (ABMS)
educational requirements of, 273
on maintenance of certification, 270–271
- American College of Microbiology,
laboratory director requirements of, 440
- American College of Physician Executives (ACPE), curriculum guidelines of, 383
- American Society for Clinical Pathology (ASCP)
in-service examination of, **283–291**, 314
on laboratory management training, 384
- Apheresis, training for. *See* Transfusion medicine training.
- Apprenticeship activities, 263
- ASCP (American Society for Clinical Pathology), in-service examination of, **283–291**, 314
- Association of American Medical Colleges (AAMC)
combined MBA/MD program list of, 382–383

Association (*continued*)
resident training recommendations of,
242–243

Association of Directors of Anatomic and
Surgical Pathology (ADASP)
laboratory management guidelines of,
387–388
training goals of, 231, 233, 236

Automated instruments, for hematology,
362

B

Bacteriology training. *See* Microbiology
training.

Biosafety issues, in microbiology, 377

Blood transfusion medicine training. *See*
Transfusion medicine training.

Bone marrow examination, 363–364

Business education, for laboratory
management, **381–395**

C

Case studies, in microbiology, 376

Certification
in microbiology, 369–370
maintenance of, guidelines for,
270–271, 280

Certified physician executive program,
383

Clinical case conferences, in transfusion
medicine training, 312

Clinical chemistry training, **343–358**
background of, 344–345
survey on, 345–356

Coagulation studies, 364–367

College of American Pathologists,
point-of-care testing definition of, 400

COMACC (Commission for Accreditation
in Clinical Chemistry)
laboratory director requirements of,
439–440
PhD training program of, 441

Commission for Accreditation in Clinical
Chemistry (COMACC)
laboratory director requirements of,
439–440
PhD training program of, 441

Communication skills
in point-of-care testing, 404, 406

in transfusion medicine, 296–297

Competencies, 247

assessment of, **269–281**
for lifelong learning, 278–280
history of, 269–272
in consultation skills, 273–275
in microbiology, 377–379
in transfusion medicine, 332–341
in-service examination for,
283–291, 314
resources for, 274–278
scorecard for, 278
skills included in, 278–279
in laboratory management, 388
in transfusion medicine, 294–306

Consultation

in microbiology, 376
skills for, 273–275

Continuing education, 235–236

Curriculum

adopted by ACLPS, 241
competency assessment and, 271–272
for informatics, 393
for laboratory management training,
386–394
for microbiology, 370–374
for PhD degree, 440–442
for transfusion medicine, 296,
298–307
goals of, 272

D

Daily rounds, in transfusion medicine,
315–316

Didactic lecture series, in research training,
249

Doctoral degree graduates
postgraduate training of, **435–446**
with MD degree, **425–434**

E

Electronic learning methods, 262–263

Erythrocyte abnormalities, tests for,
362–363

Examination, in-service, for resident
training, **283–291**, 314

F

Faculty coordinator, for research training,
245

Fellowships, 237

G

-
- Goals, of resident training, **229–240**
 diversity of, 232–233
 geared toward lifelong learning,
 235–236
 microbiology, 370
 themes distinctive for laboratory
 medicine, 234–235
- Grand rounds, in transfusion medicine, 313

H

-
- Hands-on technical activities, 265
- Hematology training, **359–368**
 heterogeneity among institutions,
 360–361
 medical microscopy in, 361–362
 on automated instruments, 362
 on coagulation tests, 364–367
 on erythrocyte abnormalities, 362–363
 on hematopathology, 363–364
 on hemoglobinopathies, 362–363
 on platelet function, 364–367
 on thalassemias, 362–363
 routine, 361–362
 trainer and trainee perspectives in,
 359–360
- Hemoglobinopathy studies, 362–363

I

-
- Informatics, training on, 385–386, 393
- Information resources, 275–277, 375
- In-service examination, resident training,
283–291, 314
- Internet, learning from, 262–263, 375

J

-
- Journal club, 260–261, 312

L

-
- Laboratory director
 regulatory requirements of, 438–440
 responsibilities of, 401–402
 training for, **435–446**
 approach to, 440–445
 importance of, 436–438
 requirements for, 438–440
- Laboratory exercises
 in microbiology training, 376
 in research training, 249
- Laboratory management training, **381–395**
 benefits of, 381–382

- curriculum for, 386–394
 delivery models for, 382–383
 importance of, 383–386
 pediatric considerations in, 387
 variation in, 384–385

- Lectures
 in research training, 249
 in transfusion medicine training,
 308–311

- Lifelong learning, 235–236, 278–280

- Literature review
 in transfusion medicine training, 309
 journal club for, 260–261, 312

- Lymphoma, diagnosis of, 363–364

M

-
- Maintenance of certification, guidelines for,
 270–271, 280

- Management training. *See* Laboratory
 management training.

- Manual, for transfusion medicine, 309

- Master in Medical Management program,
 383

- MBA degree, for laboratory management,
381–395

- MD/PhD degree graduates, **425–434**
 careers for, 427–429
 challenges in recruiting, 432–433
 laboratory medicine benefits from,
 430–432
 need for, 425–426

- Medical Scientist Training Program,
 425–426, 428

- Medical students, laboratory medicine basic
 principles for, **411–424**
 appropriate collection tubes, 416–417
 collection time, 415
 consultation availability, 421–422
 critical result reporting, 420
 direct and indirect measurements,
 417–418
 emergency ordering, 414–415
 highly abnormal results, 419–420
 iatrogenic anemia, 414
 interpretation considering clinical
 situation, 418
 methodology use, 415–416
 reasons for ordering tests, 412
 reference ranges, 418
 report units, 418–419
 results returned after patient
 discharge, 421

Medical students (*continued*)
 sample rejection, 417
 sample-dependent results, 420–421
 staff proficiency, 412–413
 test sensitivity, 413–414
 therapeutic intervention effects, 421

Microbiology training, **369–380**
 challenges in, 371–374
 competency assessment in, 377–379
 curriculum for, 370–374
 diverse needs in, 371–374
 goals of, 370
 methods for, 374–377

Microscopy, in hematology, 361–362

Morning report, 255–260

Mycobacteriology training. *See*
 Microbiology training.

Mycology training. *See* Microbiology
 training.

N

National Institute of General Medical
 Sciences (NIGMS), Medical Scientist
 Training Program of, 425–426, 428

National meetings, in transfusion medicine,
 313

O

Observation
 as teaching method, 265–266
 in transfusion medicine training, 309

Outcome Project, ACGME, 269–280, 286

P

Parasitology training. *See* Microbiology
 training.

Personalized instruction, in transfusion
 medicine, 316

PhD degree graduates
 postgraduate training of, **435–446**
 approach to, 440–445
 importance of, 436–438
 requirements for, 438–440
 with MD degree, **425–434**

Platelet studies, 364–367

Point-of-care testing, **397–410**
 advantages and disadvantages of, 402
 definitions of, 397–400
 tests used in, 403–404
 training in

advanced topics, 407–408
 communication, 404, 406
 director duties and, 399, 401–402
 medical knowledge in, 399, 402
 methods for, 408–409
 patient care, 403–404
 waived methods in, 405–406

Professionalism
 in point-of-care testing, 406
 in transfusion medicine, 297

Project, research, 248–249

Q

Quality assurance meeting, in transfusion
 medicine, 312–313

R

Reading, in transfusion medicine training,
 309

Research training, **241–253**, 263–264
 challenges in, 250–251
 competencies in, 247
 didactic lecture series in, 249
 expanded, for subspecialists, 250
 experience in, 248
 goals of, 242–245
 importance of, 241–242
 in PhD program, 444–445
 in transfusion medicine, 314
 organization of, 245–247
 practical laboratory exercises in, 249
 project in, 248–249
 proposal in, 246
 structured limited, 248

Resident in-service examination,
283–291, 314

Resident training
 competencies in. *See* Competencies.
 future options for, 236–239
 generalist track in, 243–244
 goals of. *See* Goals.
 guidelines for, **241–253**
 in clinical chemistry, **343–358**
 in hematology, **359–368**
 in laboratory management, **381–395**
 in microbiology, **369–380**
 in point-of-care testing, **397–410**
 in transfusion medicine, **293–342**
 innovative teaching methods in,
255–267
 in-service examination in, **283–291**, 314
 resident as teacher in, 261–262
 statistics on, 270
 subspecialist track in, 243–246, 250
 value of teaching methods in, 259–260

Rotation design, for transfusion medicine training, 316–331

Rounds

- in microbiology, 375
- in transfusion medicine, 313, 315–316

S

Safety issues, in microbiology, 377

Scientific presentations, 443–444

Sickle cell disease, tests for, 362–363

Structured limited research training, 248

Subspecialties, 234, 243–246, 250

T

Terrorism agents, in microbiology, 377

Thalassemia studies, 362–363

Thrombocytopenia, tests for, 365

Transfusion medicine training, **293–342**

- competencies in, 294–306
- curriculum for, 296, 298–307

- evaluation of, 332–341
- learning activities in, 307–316
- overview of, 293
- rotation design in, 316–331

U

Urinalysis, 361–362

Utilization review, of transfusion requests, 316

V

Virology training. *See* Microbiology training.

W

Weekend on-call report, in transfusion medicine, 316

Y

Yale–New Haven Hospital, transfusion medicine rotation design of, 317–331
